About me

I'm a full-stack developer from Poland who has a passion for building highly interactive applications, whether they're useful tools or just for fun pet projects. Outside of programming, I love reading sci-fi, dystopian, and fantasy genres. I'm also a coffee and tea enthusiast, always eager to try new tastes.

Experience

Front-end Developer at Storydoc

Remote, International

- Collaborated with an international team of developers, ui/ux/story designers and product managers.
- Worked on an AI-powered presentation SaaS. Implemented features such as a fully interactive WYSIWYG rich text editor, AI integration, new slide components, and PDF generation using Puppeteer. Focused on optimizing the product and was responsible for managing bug fixing.

Full-stack Developer for Dentica

Remote, Poland

- Collaborated closely with the dentist to create an easy-to-use and efficient system.
- Developed multiple iterations of a patient management desktop app for a dentist. Built a user-friendly system for scheduling appointments and keeping track of patient procedures. Created an integration with an SMS API (using cloud functions) to send automated notifications and reminders to patients about their appointments, as well as to update dentist's schedules in real-time.

Full-stack Developer at STREBER SOFT

Remote, Poland

- Worked under an experienced developer/dev-op/product manager.
- Worked on an ERP system for a plastic recycling/manufacturing plant. Developed a web app, and multiple desktop and mobile apps for production, quality, and shift management. Managed the PostgreSQL database. Implemented generation of PDF/XLSX reports. Collaborated with users to improve the system further.
- Extended an ERP system for a metal manufacturing plant. Worked on product ordering system. Maintained and implemented new features for a desktop app based on user feedback.
- Developed a responsive appointment scheduling web app for a student/work doctor. Implemented flexible and easy-to-use schedule manager. Worked on PDF generation and automated email notifications.
